## **DETAILED ACTION**

### ***Acknowledgement of Receipt***

Receipt of Applicant's response on 11/29/2006 to Office Action mailed on 08/29/2006 is acknowledged.

### ***Status of Claims***

Claims 1,3, 4, and 9 were amended as presented in the Amendment received with the aforementioned Response. As a result, claims 1-4 and 9 are therefore examined herein on the merits for patentability.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Rejection of claims 1-4 and 9 under 35 U.S.C. 112 is hereby withdrawn upon consideration of amendments submitted with the aforementioned response.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Rejection of claims 1-4 and 9 under 35 U.S.C. 102(b) is maintained. Applicant's arguments have been fully considered and found not to be persuasive. Applicant argues that the teachings of the prior art (EP0540932A1) requires at least two different film

Art Unit: 1616

materials having different permeability to be used in conjunction with the dispenser chambers and does not therefore anticipate the instantly claimed invention. However, applicant uses comprising claim language in claims 1 and 2, which therefore does not exclude further elements in the dispenser such as the prior art's film. Applicant has only amended the claims such that the first and second polymer chambers are made of the same material. Applicant further argues that the amendment presented with the aforementioned response necessitates that the chambers of the dispenser be made of the same material and therefore the prior art does not anticipate the instantly claimed invention. The prior art (EP0540932A1) teaches that the double or multiple chamber dispensers is made of the same material. (See page 12, Lines 12-17). For the foregoing reasons the instantly claimed dispenser is anticipated and the rejection is made Final.
